

Your Go

Electric Plan

- Step 1** Record the age of your gas appliances and any petrol/diesel cars (check receipts or the appliance nameplate).
- Step 2** Choose your future electric appliances and/or vehicle.
- Step 3** Prioritise the order of replacing any required appliances and/or vehicle.

Tips:

- Prioritise replacing appliances that are more than 10 years old. This can fast track your transition to an all-electric home
- Replace gas heating, cooktop and oven to improve indoor air quality
- Install solar PV to further reduce your running costs
- Improve the insulation and seal gaps in your home to reduce heating and cooling bills.
- Use the Climate Council [Calculator](https://bit.ly/3QpHqSv) to calculate your savings

We are here to help. Go to: <https://bit.ly/3QpHqSv>

Join the clean energy future and make your home all-electric. Use this plan to prepare so that when appliances need replacing, you're ready to make the switch.

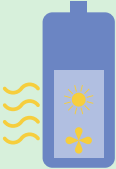

Your household could save up to 75%* per year on your bills.
