

# ALTERNATIVES TO FIREWORKS

Fireworks can be fun for  
some...but not for others.

Why not investigate environmentally sustainable  
and non-explosive alternatives, such as;

- Light installations
- Projection Mapping
- Laser Light Shows
- Drone Light Shows
- Bubble & Snow Machines
- Sky Lanterns
- Fire Performers,  
Fire Twirling & Fire Breathers
- Roaming Entertainment
- Freestanding or  
Interactive Sculptures
- Outdoor Cinemas

Did you know Low Noise Fireworks are available?

They make a lot less noise, no debris or smoke,  
making them less stressful for animals, and a lot more  
environmentally friendly while still producing a beautiful  
light and colour effect

Low Noise Fireworks achieves a favourable  
outcome for both event organisers,  
relevant stakeholders and local  
surrounding residents where you are  
able to provide a display with all the  
impact, wow factor and excitement  
without the loud bangs.

The neighbourhood dogs will love you!

We would love to discuss your event with you.  
Email [events@shellharbour.nsw.gov.au](mailto:events@shellharbour.nsw.gov.au)  
to start the conversation.
