Please attach a copy of your Certificate of Currency

**CALCULATION TABLE: RESTORATION COST AND BONDS REQUIRED
(Applicant to complete)**

Type of Road Work Components Required	Restoration Rate	Area or Length affected (m ² or m)	Restoration Cost = (Restoration Rate x Area or Length Affected)	Minimum Bond	Bond to be Paid <u>Note:</u> Higher value of restoration cost or the minimum bond
Road Pavement - Asphaltic concrete on fine crushed rock base	\$469 per m ² or agreed market rate for an engineered restoration design			\$938	\$
Footpath Area - Concrete	\$480 per m ²			\$960	\$
Kerb and Guttering	\$504 per m			\$1,008	\$
Other (Description required)					\$
TOTAL BOND TO BE PAID:					\$

Conditions

1. Please allow up to 10 business days for processing of your application once all relevant information has been submitted.
2. No work is to commence until a letter of s138 consent has been received.
3. The road opening permit, if issued, will be for a 12 month period unless otherwise stated. The permit holder will need to submit a new application if the project is incomplete after this time.
4. All utility connections under the road surface must be underbored. Trenching will only be permitted if sufficient evidence that under boring is not possible is provided to Council.
5. A driveway is not permitted to match an existing non-compliant footpath. Where the concrete footpath does not meet Council's regulation heights above the kerb, the footpath either side of the driveway needs to be removed by one metre and transitioned back to a compliant driveway cross-over. A damaged or non-compliant footpath will not be permitted to remain within the new driveway.
6. If damage bonds are applicable, they will be refunded upon satisfactory completion of the proposed works and demonstrated service performance. Up to 6 months performance may be deemed necessary to demonstrate that the restoration is not defective. The applicant must notify Council when the work has been completed so an inspection can be arranged. If works are incomplete or defective then the bond may be forfeited and Council will use up to the full bond amount to facilitate restoration of the Council asset.
7. A Traffic Guidance Scheme (TGS) showing proposed traffic signposting around the construction site in accordance with Australian Standard AS 1742.3 is to be submitted to Council as part of this application. The plan must be prepared and certified by a person holding valid Safe Work NSW accreditation. No work is to commence until the signage is erected in accordance with this TGS. Note that the TGS is to guide both road users and pedestrians on the footpath safely around the work activity.

8. A Road Occupancy Licence is required from Transport for NSW for work to be undertaken on state roads (Princes Hwy, Illawarra Hwy, Tongarra Rd, Shellharbour Rd, New Lake Entrance Rd), or on roads within 100m of a traffic light. Proposals that have significant traffic disruption, such as road closures, will be referred to the monthly Shellharbour Local Traffic Committee meeting for approval with up to an 8 week turnaround time.
9. All traffic control, including the set-up and removal of traffic control devices and/or regulation of traffic, is to be carried out by persons suitably accredited by Safe Work NSW. The contractor must produce upon request evidence that all staff involved in the above have this accreditation.
10. The contractor shall meet all obligations under the Work Health & Safety Act 2011 and relevant Safe Work NSW requirements, including appropriate traffic control.
11. Public Liability insurance in an amount of \$20 million is to be maintained for the construction period by the contractor performing the work.
12. All driveway and footpath works must be carried out by a Council approved concrete contractor. A list of council approved concrete contractors can be provided upon request. Construction and restoration work must be completed to Shellharbour City Council Specifications.
13. Prior to any excavation, a Dial Before You Dig search must be made so as to avoid hazards and damage to underground utilities. Council can provide details on its stormwater pipes.
14. For driveway construction, Council will undertake at two inspections (formwork preparation and completed works). For a formwork inspection a minimum of 48 hours' notice must be given to Council. The nominated Contractor is to phone Council to book a formwork inspection for a time when preparation is complete and compliant with Council standards. Concrete is NOT to be poured until approval is granted by Council's Driveway Inspector. A charge of \$200 applies for additional inspections. Repeated non-compliances with processes or specifications may result in removal from the approved concreter list.

DECLARATION

The Applicant declares that:

- A Copy of the current insurance Certificate is attached.
- A Copy of the Traffic Guidance Scheme (formerly Traffic Control Plan) proposed to be implemented is attached.
- The Restoration Cost and Bonds table has been completed if applicable. Any proposed work areas found to be underestimated by the applicant will be subject to additional fees and/or bonds to be paid prior to determination of the application.
- If defective work is found as a result of an audit or inspection by Council then Council can take whatever actions it considers necessary and appropriate under the *Local Government Act 1993*, *Environmental Planning & Assessment Act 1979* or any other Act or Regulation to cause the works to be rectified or removed.
- A driveway, when constructed in the road reserve, will have a non-slip surface and no raised edges that are trip hazards, and will comply with the requirements of Shellharbour City Council Engineering Code and the specifications contained with those drawings.
- The owner(s) of the above property has provided consent to the lodgment of this Application.
